* February 1968 data adjusted to 28 days before computing percentage change.

Producer Deliveries. A total of 106,157 producers delivered 3.9 billion pounds of milk to handlers regulated in 60 comparable Federal milk order markets during April 1969. This is 1.8 percent above producer deliveries in April 1968. Average daily delivery per producer increased from 1,174 pounds in April 1968 to 1,236 pounds in April of this year. Producer number, producer deliveries, average butterfat percentages, and average daily deliveries per producer for individual markets are shown on table 4.

Producer deliveries during the first four months of 1969 totaled 15.0 billion pounds, 2.6 percent above producer deliveries made during the same period in 1968. (See table 6).

Producer Deliveries Used in Class I. The volume of producer deliveries used in Class I in 60 markets increased 1.5 percent from last year, to a total of 2.4 billion pounds for the month of April 1969. (See table 5).

The volume of producer deliveries used in Class I during the first four months of 1969 totaled 9.8 billion pounds, 2.3 percent above such Class I use during the same period in 1968. (See table 6).

Percentage of Producer Deliveries Used in Class I. The average utilization percentage for April 1969 was 61 percent, compared to 62 percent last year. The average utilization percentage for the first four months of 1969 was 66 percent, the same as the average utilization percentage for the first four months of 1968.

Minimum Prices. The weighted average Class I price paid by handlers in the 60 markets for 3.5 percent milk was \$6.56 per hundredweight, 45 cents higher than the \$6.11 per hundredweight price in April 1968. Class I prices announced for individual Federal order markets for May 1969 with comparisons with May 1968 are shown on table 1.

Producers received a weighted average blend price of \$5.60 per hundredweight for 3.5 percent milk, 32 cents higher than the \$5.28 price received by producers in April 1968. Class prices, blend prices, and associated butterfat differentials, by markets are reported on table 2.

The weighted average Class I price for the January-April period for the 60 markets was \$6.56, 45 cents higher than the \$6.11 for the same period in 1968. The 1969 weighted average blend price was \$5.75, 35 cents higher than the blend price of \$5.40 reported for the same period in 1968. (See table 3).

Fluid Milk Product Sales. Total in-area sales for April 1969 in 61 marketing areas are estimated to be about 2.5 billion pounds, 0.5 percent above such sales in April of last year.

Total fluid in-area sales for March 1969 were 0.3 percent above sales for March 1968. This increase was the result of a 12.0 percent increase in skim and lowfat milk items, and a decrease of 2.1 percent, 5.5 percent, and 4.6 percent in sales of whole milk, mixtures, and cream items, respectively. March in-area sales for total fluid items, and for the four major fluid product groupings (whole milk, skim milk items, mixtures, and cream) for individual markets are reported on table 8.

For the first quarter of 1969, total in-area sales of fluid milk items in Federal milk order markets, where comparable data were available, were 1.0 percent above total fluid sales for the first quarter of 1968. Sales were up for all skim milk items, except plain skim milk. Sales of lowfat (2%) milks, and skim milk with solids added continued to show the largest increase. Sales of all other fluid milk items, with the exception of flavored whole milk, for the January through March 1969 period, were down from the previous year. Whole milk was down 1.4 percent, milk and cream mixtures were down 5.7 percent, and cream items were down 6.7 percent. Daily average sales of individual fluid milk products will appear in future issues of this publication. (See table 9).

Filled and Imitation Milk Sales. Survey data of filled and imitation milk sales in Federal order markets, February, March, and April 1969 are presented on table 13.

1/ Volumes include 29-day totals for February 1968. The percentage changes are based on adjusted 28-day totals for February 1968 to make them comparable to 1969.

2/ Markets under regulation on January 1, 1968, and which have had no significant marketing area expansions. Excludes Eastern Ohio-Western Pennsylvania, Chicago Regional, Indiana, Nebraska-Western Iowa, Georgia, North Texas, and South Texas.

3/ Class I plus Class II = 1,876,383 thousand pounds and utilization = 55% in 1968.

4/ Prior to merger with Sioux City, May 1, 1968.

1/ Plain, flavored, and fluid equivalent of concentrated.

2/ Plain, fortified, and flavored skim and part skim milk, buttermilk, and cultured specialties.

3/ Data for February 1968 adjusted to a 28-day basis before computing percentage changes.

4/ Sales represent the area after the merger and expansion of Nebraska-Western Iowa and Sioux City, May 1, 1968; Wheeling, Northeastern Ohio, and Youngstown-Warren, July 1, 1968; St. Louis and Ozarks, October 1, 1968; and, Indianapolis, Fort Wayne, and Northwestern Indiana which was formerly included in the Chicago Regional marketing area, January 1, 1969.

5/ Sales represent the area after the 1969 amendment. (The July 1, 1968 amendment merged and expanded the Madison, Milwaukee, Northeastern Wisconsin, Northwestern Indiana, and Rock River Valley markets with the area formerly regulated under the Chicago order. The January 1, 1969 amendment deleted from the Chicago Regional marketing area, the area formerly regulated under Northwestern Indiana.)

6/ Sales for marketing area as defined after the 1968 amendment.

7/ Small amount of sales estimated.

C.

MAJOR ORDER ACTIONS, APRIL 1969

Amendments:

Mississippi - April 1 (34 FR 6516, 4/16/69). This action provides that any producer who also was a producer in September 1968 delivering to a pool distributing plant which in the subsequent base-forming months did not qualify as a pool plant shall be assigned a base calculated from his deliveries during the September 1968 through January 1969 period. All base-excess plan provisions will be deleted from the order after the present base-paying period.

Neosho Valley and Oklahoma Metropolitan - April 1 (34 FR 5482, 3/21/69). In the Oklahoma Metropolitan order, amendment changes a pooling requirement for distributing plants so that all Class I disposition, instead of only that on routes, would qualify in meeting the required 50 percent of "Grade A" receipts.

In the Oklahoma Metropolitan order, the Class II price is changed from the "three-product" manufacturing price series to the U.S. average price for milk for manufacturing purposes, f.o.b. plants. This affects the Red River Valley Class II price which is tied to that of the Oklahoma Metropolitan order.

Amendment also provides for all plants operated by governmental agencies to be exempt from all provisions of the Oklahoma Metropolitan order.

In the Neosho Valley order, the Class II price is changed from the higher of the "three-product" price or the average of prices paid at local manufacturing plants to the Minnesota-Wisconsin price.

Suspension:

Inland Empire - April 1 (34 FR 6182, 4/5/69). For the period, April 1 through November 30, 1969, this action suspends the seasonal incentive payment plan (Louisville plan) of the order.

Termination:

Wichita - April 1 (34 FR 6516, 4/16/69). This action deletes the seasonal incentive payment plan (Louisville plan) provisions from the Wichita order.

New Orders:

Georgia - April 1 (34 FR 2541, 2/25/69). Other provisions were effective March 1, 1969. The basic formula price is the Minnesota-Wisconsin price for the month. For the purpose of computing the Class I price, the order provides that the basic formula price shall not be less than \$4.33. From April 1, 1969 through March 31, 1970, the Class I price shall be the Minnesota-Wisconsin price for the preceding month plus \$2.10 and plus 20 cents. This price, however, cannot be less than the Chattanooga Class I price for the same month plus 15 cents. The Class II price is the Minnesota-Wisconsin price for the month.

The Class I butterfat differential is the Chicago 92-score butter price for the preceding month times 0.12. The Class II butterfat differential is the Chicago 92-score butter price for the month times 0.115. The producer butterfat differential is the weighted average of the Class I and Class II butterfat differentials.

The Georgia order includes a base-excess plan for paying producers with September-January as the base-forming period and the base-paying period would be the entire year. The first base-making period would be September 1969 through January 1970 and March 1970 would be the first base-paying month.

New Orders: -Con.

For plants located in the Northern Zone the Class I price is reduced 15 cents. The Northern Zone includes the Georgia counties of Banks, Bartow, Catoosa, Chattooga, Cherokee, Dade, Dawson, Elbert, Fannin, Floyd, Forsyth, Franklin, Gilmer, Gordon, Habersham, Hall, Hart, Jackson, Lumpkin, Madison, Murray, Pickens, Rabun, Stephens, Towns, Union, Walker, White, and Whitfield. For plants located outside Georgia, north of an east-west line extending from the city hall in Atlanta and more than 100 miles from the nearer of Atlanta or Augusta, Georgia, the Class I price is reduced 15 cents and an additional 1.5 cents for each 10 miles or fraction thereof over 110 miles. Any location differential applicable at a plant in Alabama or South Carolina shall not be more than 15 cents.

The marketing service deduction is six cents per hundredweight and the expense of administration is four cents per hundredweight.

Southeastern Minnesota-Northern Iowa - April 1 (34 FR 5909, 3/29/69). (Pricing provisions are effective May 1, 1969).

The Southeastern Minnesota-Northern Iowa marketing area consists of the Minnesota counties of Blue Earth, Brown, Cottonwood, Dodge, Faribault, Fillmore, Freeborn, Goodhue, Le Sueur, Martin, Mower, Nicollet, Olmsted, Redwood, Rice, Steele, Wabasha, Waseca, Watonwan, and Winona; and the Iowa counties of Howard, Kossuth, Mitchell (except the city of Osage), Winnebago, Winneshiek, and Worth. Population: (1960 Census) 671,510.

The order defines a handler as the operator of a pool plant, a partially regulated distributing plant, or an other order plant; a producer-handler or a cooperative association.

A producer-handler is defined as any person who operates, as his personal enterprise and at his personal risk, a dairy farm and a distributing plant, and who receives no milk from other dairy farmers or from sources other than pool plants; and, who receives no nonfluid milk products from any source for use in reconstituted fluid milk products.

A distributing plant must dispose of at least 15 percent, during the months of February through August, and 20 percent, during the months of September through January, of its total "Grade A" receipts as Class I milk either on routes or moved in the form of packaged fluid milk products to other plants. At least 10 percent of such receipts must be disposed of in the marketing area. Such disposition must be exclusive of receipts of packaged fluid milk products from other pool distributing plants. A supply plant must ship at least 15 percent of its total "Grade A" receipts each month to pool distributing plants. If this qualification is met in each of the months of September through November, the plant has automatic pool plant qualification for the months of December through August. Definition of a nonpool plant includes an other order plant, a producer-handler plant, a supply plant, and an exempt governmental plant.

During the months of February through August, a handler or a cooperative association may divert without limit during the remaining days of the month, the milk of any producer who was a producer during the previous month or whose milk is received at a pool plant on at least one day during the current month. During the months of September through January, a handler or a cooperative association may divert the milk of any producer whose milk is received at a pool plant on at least one day during the month except that the aggregate quantity of diverted milk cannot exceed the quantity of milk received during the month from all producers.

The Class I price for the current month is to be announced on or before the 5th day of each month. The uniform price is to be announced on or before the 12th day after the end of each month.

Class I milk is all skim milk and butterfat disposed of in the form of fluid milk products, in end-of-month inventory of packaged fluid milk products, and not accounted for as Class II milk. Class II milk is all skim milk and butterfat: Used to produce any product other than a fluid milk product; represented by the nonfat milk solids added to a fluid milk product which is in excess of the weight of an equivalent volume of the fluid milk product prior to such addition; disposed of in bulk to a commercial food processing establishment; dumped or disposed of for animal feed; in end-of-month inventory of bulk fluid milk products; and, in shrinkage.
